

**FIXED ASSETS MANAGEMENT SOFTWARE**

**ABS Information Systems (Pvt) Ltd**

**Solutions and Beyond**

## ABOUT THE COMPANY

In business as in sports, it is the disciplined people - focused squarely on a goal - who turn teams and companies into winners. In business, however, the challenge of building a winning operation is often magnified by the internal complexities of the organization.

ABS Information Systems (Pvt) Ltd help your company become a winning organization by streamlining your essential internal processes through supplying software solutions that support the

Financial, payroll, human resource and inventory components of your operation. It is our business to understand organizational strategies, structures and processes, and to determine how information systems can enhance the functioning of an organization. We know how to build software with a clear strategic focus that will enhance work processes.

## ABOUT THE FIXED ASSETS MANAGEMENT SOFTWARE

AZZETZ is full-featured fixed asset management software that has been specifically designed to assist companies to account for and manage their fixed assets. It provides end-users with intuitive interface, ease of use and minimum learning process. Designed to cater for a wide range of business, the program provides complete management control over fixed assets minimizing the time and effort. With its comprehensive features and flexibility in data handling, keeping track of valuable capital assets could never be easier. AZZETZ is packaged with excellent reporting capability with thoughtfully designed reports in all aspects. The ability to select report output destination to different document formats like PDF, MS Word is yet another incomparable feature offered by the software. In addition, with the powerful utility provided in AZZETZ users can export all standard reports to Microsoft Excel format for user formatted reporting & presentation purposes. AZZETZ operates under Windows 7 / 8 / 8.1 and 10.

It is already available in two editions as Standard Edition & Enterprise Edition.

- **Standard Edition;** operates under multi-users environment with built-in security access control to maintain records of a single company □
- **Enterprise Edition;** specifically designed for professional firms and conglomerates that require maintaining of records for multiple companies.
